#### EAST TERMINAL

The switchgear for electrical remodel arrived enabling us to resume the project. It should be complete by the end of this week.

We will shift our emphasis on the Ideal transfer and attempt to fill our silos as soon as possible after which the transfer will be shut down until more inventory space develops.

I attended a seminar on the new Drug Free Workplace Act. I will be forwarding information on this new law which applies to federal contracts over \$25,000.

We began the automatic control of the pH of the settling pond. It appears, from early indications, we will not need as much acid addition as we had estimated.

Saturday overtime and overtime during the week continued, a result of the bulk bag orders.

We agreed to allow Glenbrook Nickel Co., to temporarily store kiln sections at our plant for two months if they purchase them from our demolition contractor and are unable to ship them right away.

#### WEST TERMINAL

Maintenance and safety work dominated this weeks activities. Saturday overtime was scheduled.

A doctors case developed when an employee assisting near a welding operation got a flash burn. There was no lost time.

#### SUPERIOR QUARRY

The mining continues. We are at 87,000 tons at this time. The MSHA inspector visited the site issuing five citations to the operator. Weyerhaeuser geologists also visited the site for a look around.
